DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Derezinski.

Derezinski discloses a multi-staged vented extrusion screw with features of the claimed invention including a drive section (col. 5, line 38-45) defining a chamber, an extension section (such as the melting section), and at least one vent with the associated hole (cavity) positioned proximate to the melting extension section.

3. Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-6, and 8-20 are allowed over the prior art of the record.

Response to Amendment

5. Applicant's amendment and argument filed 11/05/03 have been fully considered and it is either non-persuasive or moot in view of the new ground of rejection. The body of the claim

Art Unit: 2855

recites few structural elements without any relation to a shock tube. Applicant is reminded that although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The applied cited art show a drive section, various extension sections and a vent. It appears that as far as a vent can be used it is active.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (703) 308-5248. The examiner can normally be reached on Monday-Friday from 8:00 AM to 5:30 PM.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-4900.
